

Secure, Touchless Access Your Way

Effortlessly enroll users in minutes
using our self-enrollment feature

**3D Face Verification +
Liveness Detection**

**Mobile/NFC Credentials
Guest Cloud Keys**

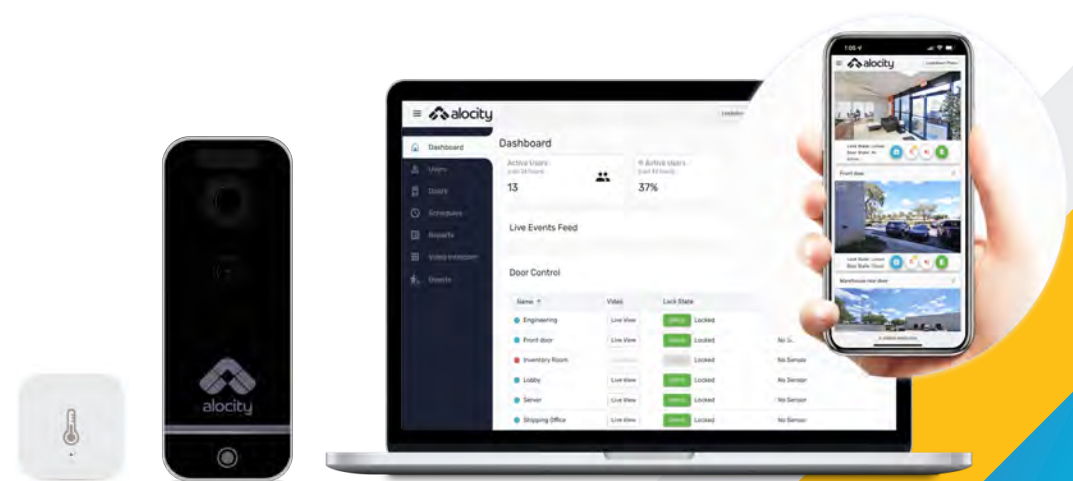

**Encrypted Cards/FOBS
Mifare/Desfire 13.56 Mhz**

An Intelligent Security Platform

To Manage Access Control with Video
& Connected Sensors

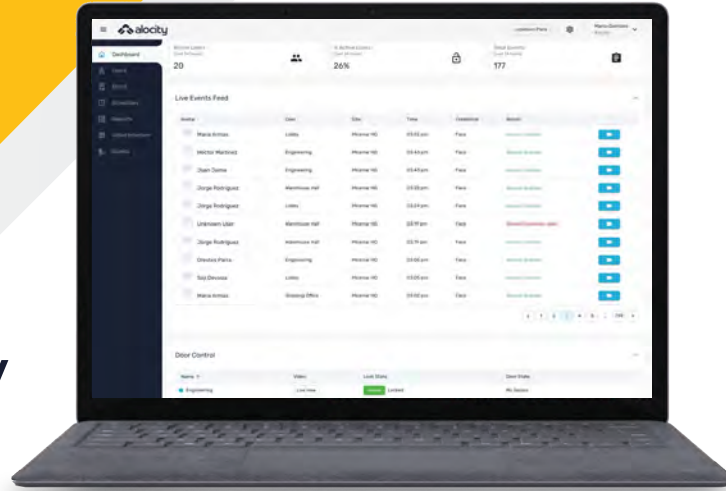

Anytime, Anywhere on Any Device

The world is evolving, so should your access control!

Traditional access control systems have remained unchanged for decades, which is why at Alocity we designed a cutting-edge, cloud-based intelligent security platform, a multi-function video door reader, powered by Access Intelligence, and packed with all the latest features and technology to keep you and your organization safe. Say goodbye to outdated and ineffective solutions and join us in embracing the future of physical security.

Intelligent Security Platform

Scalable

Manage one or hundreds of sites, doors, cameras, users, roles & groups.

Remote Management

Instantly lock or lockdown doors anytime, from any device.

Video Events

Associate video with access events or alerts and visually monitor door entries.

API Integration

Customize your system with our open API architecture.

Instant Alerts

Receive real-time alerts of critical events by email, text or dashboard.

Smart-Automation

Setup powerful integrated workflows to trigger events, processes and alerts. Create smart lockdown workflows

Smart Video Intercom

Receive instant push notifications when the Alocity video doorbell is pressed, so you know the moment someone's at the door.

- Instantly see live video at the door
- Remote unlock doors
- Two way audio streaming with noise cancellation
- Create video wall to easily view multiple doors at once.
- With smart dial, visitors simply tell the reader who they are coming to see, and the system automatically routes the call*

**Coming soon*

Multi-Function Video Reader

3D Face Verification + Liveness

Fast, frictionless, & secure access using 3D Face Verification.

Encrypted FOBs & Cards

Add mifare/desfire credentials with encryption.

AI Video Analytics

Computer vision edge processing for human, object, & vehicle detection.

Zigbee IoT Gateway

Add motion, entry, relays, push buttons and locks with automated workflows.

Mobile Credentials

Use the Alocity mobile app to install open doors with your smartphone.

Video Doorbell

See, talk and identify visitors at the door.

Embedded Access Panel

On-board dry contact relays, GPIOs, Wiegand, and OSDP.

Video Integration

Integrates seamlessly with 3rd party VMS via RTSP or Onvif type S and T.

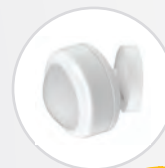

Connected Sensors

Get real-time insights from your facilities with our Zigbee sensor platform. Our open ecosystem seamlessly integrates most Zigbee sensors with Alocity door readers, making it easy for you to manage and use valuable data to make informed decisions
